Clinton Baker

Data Systems Engineer | Data Engineering, ML/AI & Software

Salt Lake City, UT 84108 • 435-219-1503 • clintjbaker@gmail.com • linkedin.com/in/clintjbaker • github.com/ClintBaker • clintjbaker.com

PROFESSIONAL SUMMARY

Data Systems Engineer with 2 years of experience building production data pipelines, automated ETL workflows, and internal data tools. B.S. in Data Science, Arizona State University, expected December 2026. Admitted to ASU's M.S. in Computer Science with an emphasis in big data systems, starting Spring 2027.

EXPERIENCE

Data Systems Engineer — JLB Companies • Salt Lake City, UT / Remote • Dec 2023 – Jan 2026

- Architected and maintained high-volume data ingestion pipelines, ensuring reliable, scalable data flow across operational systems.
- Consolidated and cleaned operational data through automated ETL workflows, unifying disparate inputs into a centralized Supabase PostgreSQL environment.
- Implemented OCR-based ingestion using the Google AI API, processing roughly 1,000 forms per day and avoiding an estimated 5–10 minutes of manual data entry per form; supported 2 administrative staff, with about 10 field team members uploading forms.
- Built internal web tools with Next.js that enabled stakeholders to securely upload, edit, validate, and visualize data in real time.
- Managed the CI/CD pipeline (GitHub / Vercel) for the OCR project, overseeing deployment of the Next.js application.
- Developed Jupyter Notebook workflows with pandas and Plotly Express to analyze trends and support leadership decision-making.

SQL & Python Trainee — The Global Career Accelerator • Remote • Sep 2025 – Dec 2025

- Analyzed real-world datasets in Jupyter Notebooks with Python and SQL, produced insights and recommendations, and communicated results verbally, in writing, and with Plotly visualizations while collaborating with a global team.

Junior Web Developer & Teaching Assistant — V School Coding Bootcamp • Remote • Oct 2023 – Jun 2024

- Applied software development best practices with JavaScript, React, Node.js, REST APIs, and MongoDB; taught and supported students learning web development.

PROJECTS

OCR PDF Automation Ingestion • Next.js, TypeScript, Google Gemini OCR, PostgreSQL • github.com/ClintBaker/ocr-production-data

- Built a system that ingests PDF forms, extracts structured data with Google Gemini AI, and surfaces results in a centralized dashboard; includes a video overview on YouTube.

YG Stathead — Strokes Gained Explorer • Next.js • ygstathead.com • github.com/ClintBaker/yg_stathead_ygt

- Scraped Your Golf Tour (YGT) player profile data from ygtour.com and built a live, deployed web application exploring strokes-gained performance for 24 players across 2 tour stops (Season 01).
- Built five interactive views — leaderboard, sortable category matrix, team rankings, player detail profiles, and head-to-head comparison of up to 3 players — across Total, Off-the-tee, Approach, Around-the-green, and Putting strokes gained.
- Implemented metric/stop/team filters, player search, shareable URL-encoded view state, and CSV export.

Student Analysis (R) • github.com/ClintBaker/student-academic-performance-analysis

- Cleaned and explored a 7,000-row dataset with feature engineering and multiple linear regression to analyze student academic performance.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript/TypeScript, R, Java, C++, HTML/CSS
Data & ML: Pandas, NumPy, PyTorch, TensorFlow, Jupyter, Plotly
Databases: PostgreSQL, MySQL, MongoDB, Supabase, Neon DB
Engineering: ETL processes, data warehousing, REST APIs, FastAPI, React, Node.js, Next.js, CI/CD (GitHub, Vercel), CRM systems, sales analytics, forecasting
Familiar with: dbt, Airflow (no production experience)

EDUCATION

Arizona State University — M.S. Computer Science, emphasis in Big Data Systems • Admitted, starting Spring 2027 (pending B.S. completion)
Arizona State University — B.S. Data Science • Expected December 2026
Relevant coursework: Data Science Capstone (DAT 490), Intro to Artificial Intelligence (CSE 471), Intro to Machine Learning (CSE 475)
